Part 1: User Research

1. Project Name:

Notara (Derived from Notes + Unique Era / Ara, symbolizing a new, intelligent era of digital documentation).

2. Application Description

Notara is an all-in-one smart note-taking and document management ecosystem designed specifically for modern students, academic educators, and busy professionals. The application transcends traditional note-taking frameworks by seamlessly unifying comprehensive PDF annotation, AI-driven document synthesis, real-time handwriting-to-text conversion (OCR), and synchronized multi-format media anchors.

Operating on an advanced digital ink engine, Notara empowers users through innovative focus mechanisms like the clutter-free Immersive Study Mode (integrated with Pomodoro tracking) and highly visual spatial ideation layouts via the Creative Mood Board Canvas. The system operates under a multi-tenant paradigm split into an intuitive mobile workspace for daily users and a centralized, data-driven administrative hub for institutional oversight.

3. Problem Identification

Traditional note-taking and document interaction applications suffer from critical architectural and UX limitations that severely disrupt student and professional workflows:

- **Application Fragmentation:** Users are forced to constantly cycle between multiple disconnected platforms (e.g., using one app for reading PDFs, another for writing notes, a third for recording lectures, and a fourth for task tracking). This fragments focus, reduces cognitive continuity, and drains user energy.

- Academic Financial Barriers: Premium digital tools and advanced cloud syncing features are locked behind expensive subscription models, which heavily penalizes students operating within strict academic budgets.
- Digital Fatigue & Distractions: Standard document viewers are cluttered with dense toolbars, system alerts, and notification badges that continually break user focus during critical, deep-study sessions.
- Lack of Actionable Productivity Assessment: Users frequently lack data-driven visibility into their study habits, failing to understand their peak productivity hours or track document engagement over time.

4. Project Goals

- Unify the Digital Workspace: Build a centralized ecosystem where cross-platform document conversion, text editing, cloud storage, and contextual audio logs coexist fluidly.
- Democratize Academic Cloud Storage: Introduce an integrated, automated Verified Student Plan and gamified ad-rewards to provision free premium cloud storage allocations to verified academic students.
- Gamify and Elevate Focus: Implement dedicated focus states (Immersive Study Mode) that leverage immediate structural rewards (study tokens, read-page counters) alongside time-boxing methods (Pomodoro).
- Deliver Actionable User Insights: Produce highly visual, personalized data summaries (Smart Insights) to turn abstract study metrics into actionable productivity profiles.

5. User Interview Questions

1. How does your typical study or work session look like, and what types of files do you interact with the most?
2. Walk me through the apps you currently use for reading or note-taking. What makes you stick to them?
3. What is the biggest frustration you face when trying to find an old note or a specific document?
4. When inspiration strikes or you need to brainstorm, how do you usually map out your ideas?

5. How do you feel about shifting between handwriting with a stylus and typing? In a perfect world, how would you like the app to handle this?
6. Can you describe a situation where recording audio during a lecture or a meeting would have been a lifesaver for your notes?
7. What are the biggest distractions that break your focus when you try to study from your phone or tablet?
8. How do you currently track your productivity or know whether you've had a successful study week?
9. When reviewing long, complex academic papers, what takes up most of your time and effort?
10. Tell me about your experience reading documents late at night or on the go. What strains your eyes the most?
11. How do you usually collaborate on a project or share your annotated files with classmates? What slows this process down?
12. As a student, what are the financial boundaries or budget limitations you consider before choosing a premium app feature?
13. Which device do you rely on the most throughout the day, and how does your usage change when switching between a phone and a tablet?
14. If you could magically add one "superpower" to your current study tool to save you an hour every day, what would it be?
15. How often do you find yourself jumping between different apps just to finish a single study task, and how does that affect your energy?

6. User Needs

Based on exploratory research and target audience evaluation, user demands are prioritized into the following key categories:

Functional Needs:

- The capability to annotate, sign, split, and merge heavy PDF documents easily.
- An accurate Handwriting-to-Text (OCR) module to digitize stylus inputs instantly.
- Contextual audio capabilities that anchor recorded lecture clips directly to specific lines of text.

Psychological & Productivity Needs:

- A zero-clutter reading interface to mitigate study-induced eye strain and attention decay.
- Visual brainstorming fields that allow free-form spatial mapping of ideas instead of rigid list hierarchies.

Administrative & Oversight Needs:

- Granular system matrices to control and monitor platform access roles.
- Automated backup intervals to safeguard heavy, multi-device research libraries against structural data loss.

7. User Types

A. End-Users (Mobile App):

1. Academic Students: Main users who take notes, study via Study Mode, and get free student space.
2. Educators & Lecturers: Users who review files, use AI summary, and create Creative Mood Boards.
3. General Professionals: Employees and freelancers who use the app for daily organization and file conversion.
4. Application Administrator: Manages student verifications, user support, and system reports.
5. System Admin: Controls full system permissions, user accounts, and platform security.

8. Personas:

1. Student – Sara Amr

- Age: 21
- Academic Field: Bc Of Management
- Core Goal: To efficiently organize dense medical lecture PDFs and handwritten notes, and leverage the handwriting-to-text feature for faster exam preparation.

- Key Challenge: Frequently moves between different study locations and struggles with manual file management across multiple devices.

Figure 1: Sara Amer Persona

2. Teacher – Dr. Khaled Naser

- Age: 48
- Specialization: Accounting Professor
- Core Goal: To seamlessly annotate students' financial PDF assignments and share instant, clear voice and text feedback.
- Key Challenge: Highly dislikes cluttered or complex user interfaces and avoids tools that require extensive technical training.

Figure 2: Dr. Khaled Naser Persona

3. Professional User – Lina Odeh

- Age: 34
- Job Title: Academic Researcher
- Core Goal: To accurately consolidate research document summaries and link contextual audio notes directly within heavy academic papers.
- Key Challenge: Experiences data fragmentation and often loses track of critical files when switching between her phone, tablet, and PC.

Figure 3: Lina Odeh Persona

4. Application Administrator – Ziad Al-Ali

- Age: 40
- Job Title: IT Application Administrator
- Core Goal: To seamlessly manage data storage quotas, optimize automated backup synchronization, and monitor real-time application performance metrics.
- Key Challenge: Frustrated by repetitive system bugs and requires immediate, detailed diagnostic reports to keep the platform stable.

Figure 4: Ziad Al-Ali Persona

5. Admin (Platform Manager) – Amani Barakat

- Age: 42
- Job Title: Academic Platform Manager
- Core Goal: To efficiently monitor user behaviors, manage complex access permissions (roles), and audit system activity logs.
- Key Challenge: Constantly overwhelmed by a high volume of user complaints due to a lack of optimized, dedicated administrative dashboard tools.

Figure 5: Amani Barakat Persona

9. Competitor Analysis:

Secure Digital E-Signatures	✓	✓	✗	✗	✗	✗
Predefined Templates Library	✓	Partial	✓	✓	✓	✓

Table 1: Competitor Analysis

10. Proposed Product Solutions (Key Features):

Core Note-Taking & PDF Editing

- Full support for editing, signing, and annotating PDF files.
- Advanced digital ink engine for handwriting using a stylus pen or finger.
- Real-time Optical Character Recognition (OCR) to convert handwriting to digital text.
- File converter module to change files from Word/Office docs to PDF and vice versa.

Intelligent Workspace & Creativity

- Creative Mood Board: An infinite, artistic visual canvas that replaces traditional rigid mind maps, allowing users to freely drag, drop, and link photos, rich text, and voice clips.
- Cloud synchronization with major services (Google Drive, OneDrive, Dropbox).
- Smart dynamic folder system, tagging, and customized digital notebook layouts.

Focus & Productivity (Exclusive)

- Immersive Study Mode: A dedicated focus environment within document views that hides all UI clutter and triggers an integrated Pomodoro Timer alongside a dynamic read-page counter to gamify studying.
- Smart Insights Journey: A beautifully animated, end-of-week data visualization feature (inspired by Spotify Wrapped) that graphs user productivity metrics, peak study hours, and documents read.

AI Assistant & Audio Integration

- Live continuous audio-to-text recording and vice versa.
- Audio notes anchored directly to specific lines of handwritten or digital text.
- AI Smart Assistant: Instant on-demand document summarization, deep semantic text search, and key-concept explanations.

Accessibility & Academic Support

- Built-in Night Mode, Sepia Reading Mode, and accessibility contrast adjustments.
- Secure and instantaneous document sharing via email, direct encrypted links, and push notifications.
- Verified Student Plan: Seamless verification stepper providing a dedicated tier of free premium cloud storage for academic students.

Part 2: Analysis

1. Screens Inventory:

a. Screen Enumeration:

Screen Name	User	Screen Details
Splash	All Users	App logo and slogan with loading animation
Login / Signup	All Users	Email/password or Google login or create new account

Screen Name	User	Screen Details
Dashboard/Home	Student, Teacher, Professional	Recent Notes, calendar, Tasks, Button Create a new file
Dashboard/Admin	Admin, App Admin	User Statistics, System Reports, Control and Setup buttons.
New File Creation	Student, Teacher, Professional	Choose: New note, PDF, Word, etc.
Note Editor	Student, Teacher, Professional	Writing tools, audio recording, photo merging, export, OCR, Tags
File Viewer & Editor	Student, Teacher, Professional	Open/edit/merge/import/Convert PDF, DOCX, PPTX, e-signature, OCR
Voice Note	Student, Teacher, Professional	Record/save/run, insert voice comments, attach with the note
Collaboration Center	Student, Teacher, Professional	Invite, comment, live chat inside document
Calendar View	Student, Teacher, Professional	Weekly or monthly calendar, link notes, notifications, tasks
Recycle Bin	All Users	Safety bin to restore or permanently delete files after a 90-day retention.
AI Tools (Assistant & Summary)	Student, Teacher, Professional	Docs summarize, Smart assistant, Intelligent search
Templates Library	Student, Teacher	Predefined layouts: planner, lined, graph. Templates for study, personality, or tasks
Search & Organize	All Users	Tagging system, keyword search, folders
Profile	All Users	User info, backups, Student verify, Privacy Policy, Term of use
Notification Screen	All Users	Task alerts, posts, collaboration, edits
Settings	All Users	Theme, language, pen settings, privacy, notifications, sync, cloud service
Onboarding Guide	New Users	Walkthrough of features on first use, tooltips, and guided steps
Activity Timeline	All Users	Log of recent edits, shares, uploads, comments, and actions per document

Screen Name	User	Screen Details
Feedback & Rating	Student, Teacher, Professional	Allow users to rate the app or content, and submit improvement suggestions
User Roles Overview	Admin, App Admin	Show all available roles (student, teacher, admin...) and their permissions
Support and FAQ	Student, Teacher, Professional	Help, FAQ and Support Contact Center
Admin Settings	App Admin	Server control, backup, app performance control
User Management	Admin	User blocking, giving permissions, seeing active users
Immersive Study Mode	Students, Teachers, Professionals	Zero-distraction full screen with a Pomodoro timer and page counter.
Smart Insights Screen	Students, Teachers, Professionals	Animated weekly charts summarizing user productivity (Spotify-Wrapped style).
Creative Mood Board	Students, Teachers, Professionals	Infinite canvas to freely drop, scale, and link images, text, and audio.
Student Reward Center	Students, Teachers, Professionals	Gamified hub to unlock free cloud space via rewarded ads or study tokens.
E-Signature Canvas	All Users	Secure panel to draw, type, or upload digital signatures.
Tools & Utilities	Students, Teachers, Professionals	Batch file management dashboard (compression, merging, and encryption).
Scanner Interface	All Users	Built-in camera control for scanning documents and OCR text extraction.

Table 2: Screen Enumeration

b. Sketches:

Figure 6: Sketch1

Figure 7: Sketch2

2. User Stories

- **User Story 1 (Academic Student Perspective):**
 - As a student managing heavy university materials,
 - I want to activate an "Immersive Study Mode" with an integrated Pomodoro timer and read-page counter inside my lecture PDFs,
 - So that I can eliminate phone distractions, maintain deep focus, and easily track my daily studying progress.
- **User Story 2 (Educator / Professor Perspective):**
 - As a university professor grading digital assignments,
 - I want to record short audio feedback snippets and anchor them directly onto specific lines of my students' PDF files,
 - So that I can provide clear, personalized explanations without wasting time typing out long notes.
- **User Story 3 (Professional Researcher Perspective):**
 - As an academic researcher dealing with dense, multi-page papers,
 - I want to use an integrated AI Smart Assistant to instantly summarize texts and explain complex key concepts on demand,
 - So that I can speed up my literature review process and extract critical insights efficiently.

3. Site Map

Figure 8: User Site Map

Figure 9: Admin Site Map

4. User Scenarios

Persona 1: Student – Sara Amr

Scenario A (Experienced User):

- Context: She wants to take notes during a "Strategic Management" lecture and link them directly to the lecture PDF slides.
- Act: Sara opens Notara on her tablet and selects "Import PDF" from the home screen. Using the stylus pen, she manually annotates directly on the slides. She records the professor's audio explanation and anchors it to the specific slide page. She flags key topics with tags like "Important" and "Exam Question". At the end of the lecture, the file auto-saves and syncs seamlessly with Google Drive.
- Outcome: She is delighted by the app's flexibility and speed, feeling that studying has become much more efficient.

Scenario B (Inexperienced User):

- Context: She wants to replace her traditional paper notebooks because they easily get damaged.
- Act: Sara downloads Notara after a recommendation from a classmate. Initially, she opens a document but feels overwhelmed by the variety of pen styles and highlighting tools. Sensing her hesitation, the app's interactive onboarding tutorial automatically launches, guiding her step-by-step through the core features. She quickly grasps the interface and begins organizing her lectures in half the time it used to take on paper.
- Outcome: Though initially frustrated, the intuitive onboarding turns her experience around, leaving her excited to use the app daily.

Persona 2: Teacher – Dr. Khaled Naser

Scenario A (Experienced User):

- Context: He wants to grade and review his students' digital PDF assignments clearly and efficiently.
- Act: Dr. Khaled opens a student's assignment PDF inside Notara. He uses his stylus pen to write remarks and corrections directly onto the document. To provide better feedback, he records a short audio note explaining a

complex mistake and anchors it to the text. Finally, he taps "Share" and sends the annotated file directly to the student's email.

- Outcome: He finds the experience as powerful as OneNote but significantly more intuitive and user-friendly.

Scenario B (Inexperienced User):

- Context: He receives a student's PDF assignment via email and needs to send back a detailed evaluation.
- Act: Dr. Khaled usually replies with plain text emails because he dislikes complex interfaces. A colleague advises him to try Notara. Upon opening the app for the first time, he is relieved by its clean layout. He easily selects the pen tool, marks the mistakes, and adds handwritten notes. He worries about losing his progress, but soon realizes that the app automatically saves every change.
- Outcome: Initially hesitant about complex digital training, he is pleasantly surprised by how smooth and natural the application feels.

Persona 3: Professional User – Lina Odeh

Scenario A (Experienced User):

- Context: She needs to take comprehensive minutes of a strategic meeting with her international team.
- Act: Lina opens Notara and initiates the voice recorder to log the live meeting discussion. Concurrently, she jots down her own action points on the meeting document. Later, she activates the OCR feature to instantly convert her handwriting into clean digital text. She moves the finalized file into the "Meetings > Q3" folder, which instantly syncs with her Google Drive workspace.
- Outcome: The dynamic tool integration makes her feel highly organized and drastically improves her productivity.

Scenario B (Inexperienced User):

- Context: She wants to digitize her scattered academic research papers but struggles with technology.
- Act: Lina downloads the app based on a colleague's advice. She successfully records an audio note but does not know how to link it to a specific

paragraph. Recognizing her navigation pattern, the embedded AI Smart Assistant prompts a helpful micro-tip overlay. It guides her on how to anchor audio to text and quickly structure her research library.

- Outcome: She feels empowered to explore the application further, confident that it will save her immense time and effort.

Application Administrator – Ziad Al-Ali

Scenario A (Experienced User):

- Context: He needs to configure automated sync frequencies and review background security logs.
- Act: Ziad logs into Notara's central admin dashboard on the web. He adjusts the global cloud synchronization frequency to trigger every 12 hours. He then initiates a full system diagnostic scan to examine crash reports and ensures the automated database backup is executing flawlessly on Firebase.
- Outcome: He concludes that the platform's architecture is highly flexible, stable, and enterprise-ready.

Scenario B (Inexperienced User):

- Context: He is tasked with setting up and validating the platform's storage backup rules.
- Act: Being relatively new to the operational system dashboard, Ziad finds the dense configuration panels somewhat daunting at first. He cautiously explores the layout, reading the tooltips for each network setting. Within a short time, he gains clarity and successfully schedules the platform's dynamic backups without a single error.
- Outcome: His initial anxiety about causing a system glitch disappears as he finds the backend interface surprisingly clear and manageable.

Admin (Platform Manager) – Amani Barakat

Scenario A (Experienced User):

- Context: A massive influx of new university accounts requires the structured assignment of system permissions.

- Act: Amani accesses the User Management Portal on the dashboard. She creates separate authorization groups customized for students, teachers, and supervisors. During her security sweep, she revokes access for an abusive account violating platform terms and concludes her session by exporting a comprehensive weekly system activity report.
- Outcome: She feels fully in control of the educational workspace due to the clean administrative layout.

Scenario B (Inexperienced User):

- Context: She needs to audit the recent operational logs and behaviors of flagged accounts.
- Act: Lacking an extensive technical background, Amani initially feels unsure about navigating database audit logs. She requests a brief orientation from the IT administrator. As she spends time interacting with the portal, she grows accustomed to the controls, successfully filters the user list, and takes appropriate moderation actions based on system data.
- Outcome: Though initially confused by technical jargon, she adapts quickly and manages the platform effectively.

5. User Flow: Optional (Bonus):

Figure 10: User Flow

6. System Analysis:

1. Splash Screen

- Image (Logo): Show app identity on startup.
- Text (Slogan): An introductory sentence about the application to attract the user.
- Loading Animation: Shows that the app is loading.

2. Login Screen

- Text: Screen name (Login)
- Input Field: to enter user email
- Input Field: to enter user password

- Icon: hide/show password.
- Button: login Button
- Text: forget password
- Text: don't have an account? Signup
- Check box: remember me
- Image: App logo
- Icon: Login with google, Facebook, twitter.

3. Signup Screen

- Input Field: to enter user email
- Input Field: to enter username
- Input Field: to enter user password
- Input Field: to enter password confirm
- Text: Screen name
- Icon: back arrow
- Check box: remember me
- Image: App logo
- Icon: Login with google, Facebook, twitter.
- Button: Signup

4. Forgot Password 1

- Icon: message
- Text: your number for message
- Icon: email
- Text: your email for message
- Image: logo
- Text: Screen name
- Icon: back arrow
- Button: continue

5. Forgot Password 2

- 4 Input Field: for Code

- Button: Next
- Text: Screen name
- Icon: back arrow
- Text: Enter the code

6. Create new password

- Input Field: to enter user password
- Input Field: to enter password confirm
- Text: Screen name
- Icon: back arrow
- Check box: remember me
- Image: logo
- Button: Continue
- Text: create your new password

7. Congratulations

- Pop-up menu contains:
- Text: Congratulation!
- Text: The new password has been saved
- Image: profile Image
- Icon: loading spinner

8. Dashboard/Home

- Text: Welcome + User Name
- Card/Grid View: Recent Notes or Files
- Calendar Widget: Mini Calendar View
- Tasks Summary: List of Recent Tasks
- Button (Floating Action Button): To create a new note/file
- Bottom Navigation Bar: To navigate between main sections (Home, AI assistant, Template)
- Search Bar: To quickly search for files or notes
- Icon: profile
- Icon: Menu to navigate between main sections

- Text: Recent, starred, file's

9. Dashboard/Admin Screen

- Text: Dashboard Title
- Charts/Graphs: User Statistics
- Button: Open System Reports
- Button: Access Control Settings
- Table View: View users or activities by category
- Filters: Filter by type or time
- Icon: Menu to navigate between main sections
- Icons: for Customer, order, task...

10. File View

- Text: Welcome + User Name
- Button (Floating Action Button): To create a new note/file
- Bottom Navigation Bar: To navigate between main sections
- Search Bar: To quickly search for files or notes
- Icon: profile
- Icon: Menu to navigate between main sections
- Text: Recent, starred, file's
- Image & text: word, PPT, Note, xls...
- Icons & text: This Device, My Documents, One drive.

11. New File Creation Screen

- Text: File type
- Button: Create a new note
- Button: Import PDF
- Button: Upload a Word or PowerPoint file
- Icon: Pull from files or Google Drive

12. Starred

- Text: Welcome + User Name

- Button (Floating Action Button): To create a new note/file
- Bottom Navigation Bar
- Search Bar
- Icon: profile
- Icon: Menu
- Text: Recent, starred, file's
- Icon: stars
- Text: starred file, note, mood boards...

13. Creating File

- Pop-up contains:
- Text: create new
- Image & text: word, note, PPT...

14. Search

- Search Bar: To quickly search for files or notes
- Icon: search
- Icon: voice
- Text: Screen name
- Icon: back arrow
- Text: Not found
- Text: Sorry the thing you are looking for does not exist
- Image: no item

15. Profile Screen

- Avatar Image: Displays the user's profile picture.
- Text Fields: Shows name, email, and account type.
- Icon: Camera for Edit profile photo.
- Backup Button: Create a backup of user data.
- Logout Button: Log out of the account.
- Student Verify Button: verification student account.
- Privacy policy Button: Show Privacy policy

- Term of use Button: Show Term of use
- Text: Screen name
- Icon: back arrow

16. Notification Screen

- List View: Displays all notifications in chronological order.
- Filter: Sort notifications by type.
- Text: Screen name
- Icon: back arrow
- Icon & Text: for each notice

17. Scanner

- Text: Screen name
- Icon: back arrow
- Icon: for flash
- Icon: For HD
- Text: for choices ID Cards, Quick Scan, Extract Text...
- Icon: for insert to file
- Icon: to capture the screen
- Icon: to scan image from phone

18. Settings Screen

- Toggle Switches: Enable/disable sound, dark mode, sync.
- Dropdown: Select the app language.
- Dropdown: Access pen tool settings.
- Dropdown: General, Viewing, Annotating, Pen setting, Cloud service.
- Text: Screen name
- Icon: back arrow

19. Tools

- Text: Screen name
- Icon: back arrow

- Card layouts: to convert PDF to DOCX, PDF to DOC, Compress PDF, Secure PDF, Combine Files... etc.

20. Search & Organize

- Search Bar: Search by keywords or voice
- Text: Screen name
- Icon: back arrow
- Folder View: View files and folders
- Icon: Create a new folder
- Sort Options: Sort by date, name, or type
- Filter by Tabs: to switch between folder, documents, image, note...

21. Support & FAQ Screen

- Search Bar: Search for specific questions.
- List of Questions: Frequently Asked Questions (FAQ).
- Feedback or suggestion Button: Write feedback and rating the app.
- Text: Screen name
- Icon: back arrow
- Icon: search, voice, feedback

22. Feedback and Rating

- Pop-up contain:
- Text: We are working hard for...
- Icon: stars
- Rate Button: send rate of the app
- Input field: to enter your feedback
- Submit button: to submit your feedback

23. About Us

- Text: Screen name
- Icon: back arrow
- Text: to read information about the app.

24. AI Tools (Assistant & Summary)

- Input Field: For typing or pasting text
- Button: Summary
- AI Suggestions Panel: Smart suggestions from the assistant
- Voice Assistant: Voice interaction
- Search Input: Search within the document
- Button: Save summary
- Text: Screen name
- Icon: back arrow

25. Recycle Bin

- Text: Screen name
- Icon: back arrow
- Image: no item
- Text: Personal folder will be kept for 90 days after being deleted, and then permanently deleted.

27. Templates Library

- Tabs: Template types (study, planning, personal, etc.)
- Preview Cards: View available templates
- Button: Use the template
- Filter/Sort: Filter by type or usage
- Favorites Icon: Save as a favorite template
- Text: Screen name
- Icon: back arrow

28. Calendar View

- Monthly/Weekly/Daily Toggle: Switch between monthly, Daily and weekly view
- Calendar Grid: Display days and events
- Button: Add an event or link to a note

- Notification Icon: Appointment alerts
- Filter: Filter by note or event type
- Menu: for search, jump to date and calculate date.
- Text: Screen name
- Icon: back arrow

29. Note Editor Screen

- Toolbar: Pen, highlighter, erase tools, record audio, insert image, add to calendar, share, attachments, ...
- Input Field: For writing notes
- Tag Selector: For adding labels such as "Important" or "To-Do"
- Export Button: Save or export the file as a PDF or DOCX
- Sync Icon: Automatically syncs with the cloud
- Scan Icon: To scan papers or another note
- Floating Icon: for write comments.
- Text: Screen name
- Icon: back arrow

30. File Viewer & Editor

- Toolbar: Reading and editing tools cut, copy, sign, merge, export, signature,
- Navigation Sidebar: For browsing pages, Pens, Shapes, Stamp
- Dropdown: Annotate, Draw, Insert, Fill and sign
- Paging: to switch between the pages.
- Text: Screen name
- Icon: back arrow

31. Voice Note Screen

- Button: Start recording
- Waveform Animation: Shows the recording as you speak
- Icon: Save, stop, play
- List View: View previous recordings
- Menu: Play/Delete/Attach/Insert/share/Comment...

- Text: start recording
- Text: Screen name
- Icon: back arrow
- Search Bar: Search for specific record.

32. Collaboration Center

- List of Members: Names of collaborators
- Comment Field: Add a comment
- Live Chat Window: Live chat within the document
- Button: Invite people
- Message Field: Add a message
- Text: Screen name
- Icon: back arrow

33. Activity Timeline Screen

- List View / Timeline Layout: Vertically stacked activity logs sorted by date/time.
- Timestamp: Shows date and time of each action.
- Text Label: Description of the activity (e.g., "You edited Note XYZ").
- Clickable Item: Clicking opens the related document or page.
- Filters Dropdown: Allows filtering by activity type (e.g., only edits or uploads).
- Search Bar: For quick lookup of a specific activity.
- Text: Screen name
- Icon: back arrow

34. Language

- Text: Screen name
- Icon: back arrow
- Text: for suggested language
- Radio Button: to select language.
